Claims 1, 25-28 and 35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support in the specification as originally filed for the specific percentage of w-3 and polysorbate that is shown in claim 35 in a composition with only one w3 fatty acid. There is also no support in the specification, as originally filed, for the ratios set forth in claims 25-26 in a composition with only w-3 and polysorbate.

There is also no support in the specification as originally filed for a concentrate with one w-3 fatty acid, as required in claim 1. Example 1 shows algal oil as a source of w-3 fatty acids. At page 6, lines 19-26, a mixture of w-3 fatty acids containing animal fat are shown. Example 6 does not include a w3 fatty acid.

There is additionally no support for a composition with only w-3 and polysorbate in a ratio of 3:7. The specification shows a ratio of orange oil or essential oil to polysorbate of 3:7 in example 2.

Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has amended the claims to limit the claims to "consisting of". Claims with the transitional phrase "consisting of" that depend from claim 1 cannot add or include additional elements (MPEP 2111.03). Claim 35 does not further limit claim 1 because claim 35 includes an additional element (animal fat).

The rejection of the claims over Conklin as further evidenced by Bailey's is withdrawn in response to applicant's amendments to the claims.
